Subject: Re: Delta Outflows Planning Group - video recommendations
[Workshop 1 TBI et al 081712.pdf](#)

Sam and Matt,

for some reason, Jon Rosenfield's presentation at workshop 1 (on the LSZ and ecosystem changes) is one of the only video presentations not available. For that reason, I request that his written testimony (attached) be provided to the panel. The document is a comprehensive review of recent literature and findings on the subject.

Also, per my comments at our last meeting, if the following leading Bay-Delta scientists are not available to present directly to (and interact with) the panel, they should be videotaped in advance:

Alan Jassby
Wim Kimmerer
Jim Cloern

these three are probably the most knowledgeable in terms of overall changes in winter-spring outflow/salinity, the relationships between outflow/salinity and biotic response (primary and secondary productivity, population viability and community composition, invasive species), and related topics

Steve Culberson and/or Chris Enright on historic changes in outflow/salinity

Fred Feyrer and/or Lenny Grimaldo on fall outflow (since this involves different data and interpretations than those underpinning the larger winter-spring outflow issues)

cheers,

Gary

Subject: Delta Outflows Planning Group - video recommendations

Dear Planning Group,

As we discussed earlier today, please send us your top 5 recommended video presentations for our panel to view in advance of the February workshop. These can include video presentations that are currently available online or presentations that you would like to see produced (soon). We expect to distill this down to a list of no more than 6-10 presentations and get the panel started on these within the next two weeks. Keep in mind that ideally these should be foundational, background kinds of presentations. Presentations that you think will stimulate a lot of discussion and where you think it would be productive to have dialogue between presenters and the panel should be reserved for the workshop in February.

The table of presentations from the SWRCB fall workshops is attached to help you with your selection. You can also recommend video presentations from other seminars/workshops as long as they are readily available. Let us know if you have questions. Thanks. –Sam

Hello all,

Please see attached. I made some slight changes to Gary's markup, and I think this reflects what we agreed to in today's meeting. Don't hesitate to let me know if we have missed anything.

Best,
Matt

Dear Colleagues,

Please find attached a track changes and clean version of the charge questions. I will have copies of both at today's meeting.

Best,
Matt

Subject: Reminder: Planning Group Meeting: Delta Outflows and Related Stressors

Dear Colleagues,

This is a reminder that we have a planning group meeting tomorrow, Friday November 15 in Room C of the Second Floor Conference Center at 980 Ninth St, Sacramento (our usual meeting location). I have attached a brief agenda. Primarily we will be discussing how we have tried to incorporate your input into the charge questions, seeking guidance on a few remaining details of the charge questions, and discussing presentations to provide to the panel prior to the public workshop.

I will provide the meeting materials by email in the morning, and will provide copies at the meeting. I understand that this is not ideal, but we have been working hard to incorporate your input during this short week.

Please let me know if you have any requested additions to the agenda.

Best,
Matt
